PROFILE

Senior full stack developer with 15+ years of experience building and operating web applications, with deep expertise in e-commerce, backend systems and production infrastructure. For the past 4 years, focused on React, Next.js and Node.js, backed by extensive PHP, HTML/CSS and MySQL experience. Strong in technical leadership, REST API design, performance optimization, automated testing and Linux production operations.

WORK EXPERIENCE

IT Manager and Senior Developer

May 2022 - Present

[Cormac Associates, Varna](#)

- Lead and support a 10-person engineering team across frontend, middleware and backend delivery.
- Build and improve React and Node.js applications while maintaining PHP and WordPress systems.
- Own hosting, websites, communications systems and production support for business-critical services.
- Deliver REST integrations, Web3 integrations and smart-contract functionality.
- Coordinate priorities, quality assurance and release delivery across multiple projects.

Senior Developer

Mar 2015 - Apr 2022

[New Phone 2014, Varna](#)

- Owned full stack development for 10 company websites: 7 e-commerce, 2 wholesale and 1 informational platform.
- Built frontend, backend, middleware and REST API functionality across customer and internal systems.
- Managed cloud hosting capacity and performance for campaigns and peak traffic demand.
- Maintained IT operations across stores in Sofia, Plovdiv and Varna.
- Improved website performance, storage reliability and network security.

SELECTED PROJECTS

Atlas Demo Application

github.com/bsborisov/Atlas

- Production-oriented Next.js and TypeScript full stack application using Prisma and PostgreSQL.
- Custom authentication and sessions, Zod validation, rate limiting, automated tests, CI and Linux/PM2 deployment.

PulseOps Monitoring Dashboard

github.com/bsborisov/pulseops

- Real-time React/TypeScript dashboard using TanStack Query, WebSockets, React Router, TanStack Virtual and Recharts.
- Cache-level realtime sync, render-isolated subscriptions, 5,000-event virtualization, URL filters and optimistic rollback.
- Vitest and Playwright coverage with GitHub Actions CI for linting, type checking, tests and production builds.

Bozhidar Borisov

Senior Full Stack Developer

React / Next.js

Technology

React / Next.js / TypeScript
React Router / TanStack Query
TanStack Virtual / Recharts
React Hook Form / Zod
Node.js / PHP
PostgreSQL / MySQL
Prisma ORM
Vitest / Playwright
Git / GitHub Actions
Linux / PM2 / Cloudflare
WordPress / Web3

Leadership

Technical Leadership
Team Coordination
Project Delivery
Quality Assurance
Production Support

EARLIER EXPERIENCE

Senior Developer

Mar 2011 - Mar 2015

DevLabs, Varna

- Led a team of 5-6 developers across frontend, middleware and backend work.
- Owned backend delivery for company and client projects and external integrations.
- Maintained hosting, local networks, communications and internal servers.
- Planned technical work and reviewed delivery quality.

PHP Developer

Mar 2009 - Mar 2011

BG Leads, Varna

- Developed backend solutions and REST API logic for US outsourcing projects.
- Coordinated tasks within a team that grew from 3 to more than 20 colleagues.
- Performed release quality assurance and defect resolution.

EDUCATION

Master of Engineering

2013 - 2014

Technical University of Varna

- Automation Engineering

Bachelor of Engineering

2009 - 2013

Technical University of Varna

- Automation Engineering

TECHNICAL HIGHLIGHTS

Frontend Architecture

React and Next.js application architecture, TypeScript, routing, server-state management, forms, realtime interfaces and performance optimization.

Backend and Data

Node.js and PHP services, REST API design, Prisma ORM, PostgreSQL and MySQL, integrations and e-commerce systems.

Testing and Delivery

Vitest, React Testing Library, Playwright, GitHub Actions, CI checks, Linux/PM2 deployment, Cloudflare and production support.

PROFESSIONAL STRENGTHS

- 15+ years across application development, e-commerce, infrastructure and production operations.
- Hands-on technical leadership with teams ranging from 5-6 developers to a current 10-person delivery team.
- Strong bridge between modern React development and established backend/infrastructure experience.
